

Britt Lundgren, Ph. D. is an observational astronomer and the Philip G. Carson Distinguished Professor in the Sciences and Chair of the Department of Physics and Astronomy at the University of North Carolina Asheville. She uses ground- and space-based telescopes to study the evolution of distant galaxies and recently served on the federal Astronomy and Astrophysics Advisory Committee, which prepares annual assessments of the progress toward decadal priorities in astronomy and astrophysics for the National Science Foundation, NASA, and the Department of Energy.
