

Submitting Photos for the Club Member Astro Images Gallery

The Club Member Astro Images Gallery contains hundreds of photos, all from club members, and if you would like to add yours, here's how to do it.

You must be a club member to have your photo evaluated for addition to the gallery. If you are not a member, click this link to join: <https://astroasheville.org/join-club/>

Photos are submitted through the club Google Group. You don't need to be a club member to join the Google Group. To learn how to sign up, click this link: <https://astroasheville.org/wp-content/uploads/2026/01/Google-Groups-Sign-In-Instructions-1.pdf>

The Google Group works as a conversation hub, using Gmail. Members of the group often send photos to be viewed by other members and share their experiences creating the images and tips on post processing.

If you would like to submit a photo for the gallery, please mention that in your email to the club Google Group. The photo gallery administrators read every email, and your photo will be considered if you include the following:

- Your request that your photo be considered. Not every photo submitted will be added to the gallery, but every one will be carefully judged.
- Provide some details of what the subject is, including some basic information, for example, its astronomical identifier, how big it is, how far away, where it is located in the sky, and what equipment you used to capture the image. These facts may be used to create a caption for the photo. You can add as much information as you want about the object, your experience photographing it, your equipment, and how you processed the image.
